PROFESSIONAL SUMMARY

Full Stack .NET Developer with **2+ years** of experience building enterprise web applications using ASP.NET Core, Blazor (Server, WebAssembly, Hybrid), and React, backed by SQL Server. Delivered **7+ client projects** with a **100% on-time completion rate**, applying Clean Architecture and modular component design to keep codebases maintainable at scale.

Comfortable working across the full stack — from responsive Blazor/React UIs to ASP.NET Core Web APIs and Entity Framework Core data layers — with hands-on exposure to Azure DevOps CI/CD pipelines for build and release automation. Track record of measurable impact: **40% faster data retrieval** through query optimization, **45% improvement in code reusability**, and **35% higher user engagement** through user-focused UI work.

CORE TECHNICAL SKILLS

Frontend Blazor Server / WebAssembly / Hybrid, React, HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, Tailwind CSS, Fluent UI, MudBlazor, Syncfusion

Backend C#, ASP.NET Core, .NET 6/7/8, Web API, EF Core, LINQ, RESTful API Design, CQRS/MediatR, SignalR, Hangfire, Clean Architecture

Cloud & DevOps Azure DevOps (CI/CD), AWS Services (S3), Git, GitHub, Agile/Scrum

Databases Microsoft SQL Server, PostgreSQL, MySQL, T-SQL, Database Design & Query Optimization

Cross-Platform .NET MAUI, Xamarin, Progressive Web Apps (PWA)

Tools Visual Studio 2022, VS Code, Postman, Figma, SSMS

PROFESSIONAL EXPERIENCE

.NET Developer | Focus Logic IT Solutions

Oct 2024 – Present

Parryware — ASP.NET Core Web Application

- Built a scalable ASP.NET Core web app with Clean Architecture, serving 200+ users across 5+ modules.
- Engineered REST APIs using CQRS/MediatR and integrated AWS S3 storage with Excel import/export support.
- Automated [X]+ background jobs with Hangfire and enabled real-time SignalR alerts for a React-based mobile app.
- Optimized MSSQL queries via EF Core, cutting data retrieval time by 40% while keeping modules extensible.

Simply Fresh — Multi-Platform Application

- Shipped a bilingual .NET MAUI app (web + mobile) with RESTful APIs at 99.9% uptime, managing production and inventory workflows.
- Implemented FIFO-based batch allocation across 3 workflows — purchase requests, vendor negotiation, and GRN processing.
- Delivered production and quantity dashboards for real-time operational monitoring.
- Extended Phase 1 functionality into Phase 2 without disrupting live workflows.
- Crafted a responsive UI that drove a 35% increase in user engagement.

FLBills — Multi-Business Billing & Purchase Platform

- Built a billing platform enabling 3 business types — product, service, and subscription-based — on one system.

- Developed 6 core modules — company config, customers, products, suppliers, bills, billing — using ASP.NET Core and Blazor.
- Designed a configurable business model, letting all 3 business types onboard via settings, not separate apps.
- Managed purchase bill processing, stock-related transactions, and validation logic across the platform.

OETC — Blazor Hybrid Enterprise Solution

- Architected an adaptive Blazor Hybrid enterprise app with Fluent UI, following ASP.NET Core best practices.
- Developed shared UI components reused across screens and integrated Blazor with ASP.NET Core APIs.
- Designed custom print templates with JavaScript interoperability, reducing printing errors by 60%.
- Implemented a component-based, reusable UI architecture that improved code reusability by 45%.

International & Additional Client Work

- Ioannou Coetus (Australia): Pixel-perfect marketing site using Tailwind CSS and vanilla JavaScript, delivered via Git workflow.
- AEGIS: Cross-platform .NET MAUI Blazor Hybrid app with MudBlazor components and light/dark theming.
- Delivered 3+ static sites (Laundry, Rogers, Asset Portal) with 100% Figma design accuracy.
- Maintained a 98% client satisfaction rate through iterative feedback cycles across all engagements.

ACHIEVEMENTS & RECOGNITION

□ Project Completion Award — Focus Logic IT Solutions

Recognized for successfully delivering a client project on time and to specification, reflecting strong commitment, precision, and teamwork.

EDUCATION

Bachelor of Technology — Information Technology

Sri Balaji Chockalingam Engineering College, Arani | Anna University • 2019 – 2023 • CGPA: 8.6/10

PROFESSIONAL CERTIFICATIONS

- IIS Certification — Internet Information Services
- Generative AI Certification — Be10X
- Figma UI/UX Design Course — Simplilearn Platform
